Lets touch base with Wayne. My interaction with Regions or PRPs would generally go a lot faster since the one doing the analysis would know the site. Also, they have been on soil, RESRAD Build and its lack of documentation has made it more challenging. Plus some Covid delays.

I meant with the national HQ folks. They are expecting a response based on our feedback at the meeting almost 2 months ago.

This is really dragging on. There has to be a more efficient way of handling these issues that are inline with the timeframes in the FFA. My fear is that if we keep stalling they will move forward without our input. And they can elevate this based on EPA not meeting out commitments.

Thanks

I think Wayne may schedule a meeting with them on the ACE questions, depending how they answer.

I would think we are close to finishing the ACE analysis. I don't think the Navy will get anymore out of DOE than ACE did.

Thanks, Stuart.

When do you think we can schedule the meeting? We initially told them end of March/Early April. This is holding up at least one other site as well and putting the Region in a position of being in violation of their FFAs.

I don't think anyone wants to see these sites go to dispute.

Thanks

We had the call on Thursday going over a 90% complete draft. Wayne was contacting Navy with some follow up questions that the ACE could not get out of DOE's RESRAD group at Argonne National Lab. One problem ACE had with the analysis is that RESRAD Build does not have a User Guide for risk assessment. They have one for dose assessment, but added risk to the model years later and didn't really document anything.

Hi Stuart –

DoD is reaching out to schedule the follow-up meeting.

Are you all ready to make a decision on this?

Thanks

We had the call today. ACE shared a draft of the report which is about half finished. We discussed the report, talked about some of the ACE's thoughts on completing the report including recommendations. Wayne as a follow-up provided ACE with survey data. ACE expects to send us a completed report on Tuesday and we will discuss on Thursday.

Hi Stuart –

DoD is looking to get the follow up meeting scheduled as soon as possible.

Is this call still planned for today?

Thanks

Hi Stuart –

Hope you and yours are doing well.

Were you able to touch base with USACE?

Thanks

We are supposed to have a call with them today. Heard from 2/3 ACE, their computer problems sound worse than EPA's. First ACE risk assessor thinks it will delay him a week.

Hi Stuart –

Have you spoken to the Corps? Are they still on schedule to make this happen by early April?

It's a paperwork exercise so there shouldn't be too long of a delay if any.

Thanks

Mary,

Just reaching out to determine when we want to schedule our follow-on discussion/meeting. At our meeting we were tentatively looking at the end of March possible very early April. Appreciate trying to get this on the calendar soon.

Thanks
deb

Mary,

Thank you for allowing the Navy to participate in your meeting with OSD regarding the PRG calculator/RESRAD consultation process. My interest was in learning how the consultation process works as we have had difficulty gaining EPA concurrence unless the PRG calculator is used. Although I was encouraged to hear the consultation process usually takes from a few days to a week, I was surprised to learn the consultation had not begun for buildings at either the Former Hunters Point Shipyard (HPS) or the Former Concord Naval Weapons Station. Per an action item at the meeting, the attached emails are the information provided to EPA to initiate the HPS consultation process. If further discussion is needed please let me know.

Regards

Lawrence
